

The Container At Newtown – We CAN make a difference

Our mission: to convert a recycled shipping container into a functional medical facility for an impoverished community in Africa, and in doing so, foster our sense of community and spirit of service.

We CAN dream

We CAN build

We CAN give

We CAN help

A recycled 40' shipping container (the CAN) will be delivered to our parking lot with help from Homes of Living Hope.

Arrived: Oct, 2014!

Our community of volunteers will design and build a medical clinic inside the CAN, and transform the outside with art. Donated goods and labor are needed.

Completed: Aug, 2015!

The CAN will be filled with donated supplies for the medical clinic and the community it will serve.

Shipped: Dec, 2015!

The CAN will be installed in Kisumu, Kenya with help from Life in Abundance. It will bring sustainable aid to the Luo people there.

Delivered: Feb, 2016!

We will partner with Homes of Living Hope for logistical support in the planning and shipping stages of our project. www.homesoflivinghope.org.

Life in Abundance, an African-centered NGO, will help identify and mobilize a community to receive and sustain the medical clinic. www.lifeinabundance.org

Our vision: We see ourselves and our community connected to each other and to the world by working together with love and in service to others. All are invited, encouraged and welcome to participate.

Our project is modeled after "See the Difference One Container Can Make" at Bridgewater-Raritan Regional High School, led by Dr. Leonard Herman. www.brrsd.net/HOLH/
